Architecture Decision Record

Thesis Review Workspace

Decision area	Chosen option	Alternative	Consequence
01 Platform	Responsive web workspace	Native app	Both roles use a browser and share one deployment.
02 Stack	One PHP application	Separate frontend and API	One application owns review and upload rules.
03 Data	Relational database and private files	Store documents in database	Foreign keys protect version metadata. Back up data and files together.
04 Sign-in	Local accounts and server sessions	University SSO	The pilot can start with assigned accounts. The team maintains those accounts.
05 GitHub	Store commit and pull request URLs	GitHub API synchronisation	No GitHub tokens to manage. Repository access remains in GitHub.
